

Call SUNSHINE Before You Dig

Do your spring or summer plans include planting a tree, building a pool or adding a fence? If so, **Call 811** before you dig!

"Sunshine State One Call of Florida" can help you avoid an accident. There may be underground utility lines near where you are planning to dig. Sunshine will notify all utilities in your area, who will locate and mark any lines in the area so you can avoid hitting them when digging. This service will help you avoid injury or disruption of service that may occur if utility, telephone or cable TV lines are cut.

Just call "Sunshine" at **811** and someone will be sent to locate and mark buried cables or lines. Please give 48 hours notice, excluding weekends and holidays. There is no charge for this service since it is more efficient to locate lines than to repair them. So call Sunshine and save time, trouble and money.
