What is/are your primary purpose(s) for conducting your TREE POWER program? *(If you choose more than one, please rank in order of importance.)*

To educate customers about planting trees to save energy.

To replace trees planted under power lines.

To teach citizens about the importance of trees to the environment.

Beautification of city owned property.

To improve community relations.

To heighten utility visibility.

What TREE POWER activities do you have planned? (*Use additional sheets if necessary.*)

Continue looking for opportunities to plant trees in public places and to continue to give away approximately 200 trees to the public during environmental events (Earth Day and Party in the Park).

How might APPA improve its TREE POWER program to better suit your needs?

A pat on the back in APPA's *Public Power* would be nice.
